

/Technology Use

Please Remember:

- Computers are for completing academic work; anything beyond that is a privilege. Expect no privacy!
- Use only the computer you are assigned unless you have permission from Long Barn/Cold Springs staff
- Keep your login private. Log off when you leave your computer.
- Do not disconnect or swap any equipment
- Do not use *https:* to get to any site that would otherwise be blocked by the firewall
- Games may not be played during class time
- You may listen to music on your computer provided it doesn't become a distraction, it isn't audible to anyone besides you, and you're completing 2.0 credits/week
- Do not access social media sites!
- You must complete 1.0 credits/week to maintain your Internet access: losing it can make some assignments difficult to complete at school

Students are expected to maximize their productive use of class time, and for this reason, cell phone communication during class time is forbidden. Cellphones may be used before the beginning of class in the morning, at break, and after class has ended in the afternoon. Use our handling of cell phones during class time will result in detention or suspension

During the time that students are working independently, MP3 players may be used with the teachers permission. Headphones or earbuds must be used in the volume must be low enough as to not be heard nearby. Do not share your music!

Violation of these policies can lead to loss of computer privileges, detention time assigned and/or suspension.

I have read, understand and will abide by these policies.
